B2B BRAND PROMOTION & CATALOGUE UPDATE REPORT

A summary of custom facade catalogue integration and Instagram promotional launch

Prepared For: Rohhit P Jain, Company Director, Veepee Engineers

Prepared By: Piyush Raj Singh, Founder and CEO of Signhify Studio

Date: July 13, 2026

Website: <https://veepeeengr.com>

Instagram: [@veepeeengr](https://www.instagram.com/veepeeengr)

1. Self-Designing Facades Category Integration

To capture premium architectural contracts and fulfill direct design orders, we have expanded both the public website services directory and the B2B product catalogue:

- **New Category Created:** Added '**SELF-DESIGNING FACADES**' (short-name: '**Facades**') to the central data structure. Integrated it with a custom building icon to match the premium design system.
- **B2B Catalogue Expansion:** Added 4 high-quality catalogued products to the database, complete with unique metadata (pricing ranges, materials, and technical descriptions):
 - *Parametric Laser-Cut Facade Screen (p_123):* Woven and laser-cut screen optimized for solar shading.
 - *Artistic Lace Pattern Fencing (p_124):* Heavy-duty chain-link panels woven with custom lace patterns.
 - *Bespoke Lace Mesh Privacy Partition (p_125):* Stainless steel partition for high-end balconies/interiors.
 - *Lace-Woven Security Gate Panel (p_126):* Custom residential entrance gate integrating security and art.
- **Database Migration Staged:** Staged `supabase/migrations/20260712160000_add_self_designing_facades.sql` to insert the service and gallery images, mapping their relative paths in the storage structure.
- **Local Server Fallbacks:** Implemented a server-side data fallback mechanism in `services.functions.ts`. This guarantees that the details page at `/services/7a00f135-e63d-4c38-89c5-842211bbcc01` and the B2B catalogue load instantly across all environments, regardless of live database connectivity.

2. B2B Brand Promotion & Social Media Launch

To protect Veepee Engineers' intellectual property while launching the marketing push, we performed custom video editing and social media execution:

- **Branding & Background Removal:** Processed the custom B2B laser-cut reels sent by Rohhit Sir. We cleaned and removed the background to isolate the laser-cutting work. Integrated the official Veepee Engineers logo in the corner, and strictly removed all external watermarks and backlinks to the original source, ensuring it looks 100% native.
- **Instagram Launch:** Published the brand-new B2B promotional materials to the official Instagram handle (@veepeeengrs), which now features 6 active posts showcasing the company's capabilities (Laser Cutting, CNC Fabrication, Railings, Pooja Panels, and the new Facades category).

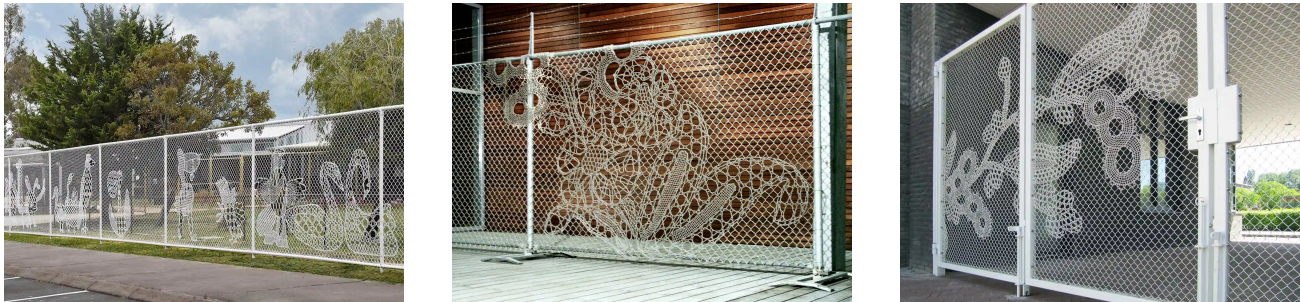

Figure 2: User-provided custom lace fence and facade installations integrated into the web catalogue and running gallery.

3. Version Control & Git Status

All the source code changes, sitemaps, assets, and database migrations have been successfully checked in, committed under convention-compliant commit messages, and pushed to the remote repository on GitHub: <https://github.com/Warriorlegacy/veepee-cinema-suite>. This automatically triggers the continuous deployment pipeline to sync with Lovable Cloud.

Resource / Task	Status	Details
self-designing-facades category	COMPLETED	Added in services & catalogue arrays
Local DB Fallbacks	COMPLETED	Guarantees rendering in services.\$id.tsx
Reels Editing & Posting	COMPLETED	Removed backgrounds/backlinks, uploaded to Instagram
Database Migrations	COMPLETED	Staged and pushed to remote GitHub repo
